

## How to receive the fabrics?

Monday, 20 July 2009 15:40 - Last revised Tuesday, 31 August 2010

---

It is important **to act precautionously** when receptionning the shipment in order to preserve your product:

- if the packaging of the batch is damaged at reception of it, **please issue a note or a complain on the delivery slip with the delivery agent** ; no complain can be taken without this.
- CLIPSO fabrics **must be stocked in their protecting cover** until the installation starts.
- If you stock rolls, please note that the fabric rolls have to be stocked horizontally. Verify this at deliver.
- Remember always to stock Clipso fabrics in a room where average temperature is not lower than 0°C or higher than 40°C;
- **Do not put anything on the packages.**
