clipso, the ideal solution for modular construction projects with an environmental approach.

The growing success and increasing reputation of our products make **clipso** THE manufacturer of PVC-free stretch wall and ceiling coverings. **clipso** is one of the major actors and world leader in this industry.

Are you a housing constructor (modular housing, traditional or prefabricated housing, apartment blocks, offices etc.) looking for **THE solution which best meets your specifications?** We can offer quick and easy installation, an environmentally-friendly service, competitive prices, impeccable aesthetic finishes, compliance with standards, and adaptation to technical constraints.

clipso products offer interesting advantages which can adapt to your specific needs:

French manufacture certified ISO 9001 from raw materials of European Union origin.

Choosing **clipso** products means choosing an environmentally-friendly and highly comfortable solution as well as ensuring compliance with current and future standards!

- Perfectly **designed for interior design and renovation**, **clipso** coverings can be adapted to all situations.

- **clipso** offers a **wide range of decorative and functional coverings** which improve the comfort and quality of life of occupants: standard, coloured, sparkly, acoustic, translucent, anti-bacterial, dirt-repellent and water-repellent coverings.

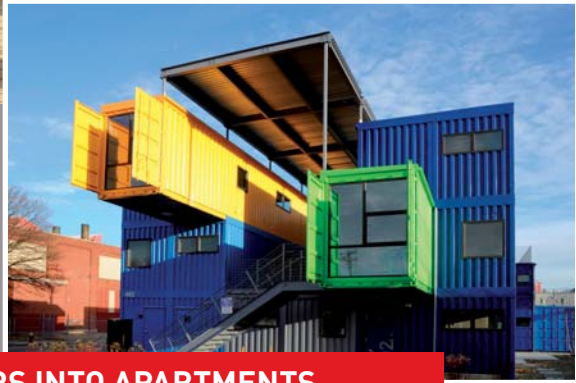

- **The clipso installation technique minimises its environmental impact** as it is carried out **cold** (unlike ceilings made from soft PVC which must be heated), is **quick** (no need to wait for plaster to dry to sand and paint) and **clean** (no dust or paint stains).

- The solution provides **significant savings** (less manpower needed) for each project carried out, thus guaranteeing an **added value for your building project**.

- **clipso** coverings are **free of toxic substances (CMR) and volatile organic compounds (VOCs)** to guarantee you a **better interior air quality**.

- **As proof of their excellence, safety and compliance**, **clipso** products are **CE, IMO and Sanitized** certified, with **Oeko-Tex eco-label** and **A+ label** (the best score).

quick and simple installation

RENOVATION OF CONTAINERS INTO APARTMENTS

TRANSFORMATION OF AN INDUSTRIAL BUILDING INTO LOFTS

Today, **clipso** works in close collaboration with the Groupes MCP (France) and SchwöererHaus KG (Germany), specialists in the construction of modular and sustainable housing.

clipso coverings and profiles for walls and ceilings integrate perfectly into this concept and thus contribute to the great success of this kind of housing.

*We discovered **clipso** products during online research. We were mainly in search of a ceiling technique with dry installation, thus without paint, and which was flexible enough to be able to meet the various dimensional requirements of our wooden houses. We also needed a quick and easy installation which could be carried out by our installation team.*

*We are completely satisfied with the service, its follow-up quality, technical implication and reactivity of deliveries. As for the product, **clipso**'s willingness in terms of R&D responded fully to our expectations. In addition, the result is perfect for the ceilings which will last over time and without any cracks.*

Mr Bernard Voisin

Research and Development Director for the Groupe MCP

*We have selected the **clipso** acoustic covering because, on the one hand, it allows the reduction of reverberation time in the room and the concealment of our loudspeaker system. On the other hand, the assembly was extremely quick, another of **clipso**'s indisputable advantages. The appearance of the fabric, as well as the profiles, is really unique.*

*To summarise, we are convinced by the faultless execution of the order, the delivery and the installation. We can confidently recommend **clipso** products!*

Mr Florian Schmid

Research and Development Director for the Groupe SchwöererHaus KG
