clipso, the ideal solution for the decoration or renovation of spaces in the hospitality and restaurant industries

*R*estaurants and hotels strive to create an ambiance that will satisfy their patrons. Aesthetics and acoustics are the most fundamental elements in the design for a suitable environment. Both functional and visually captivating, **clipso** stretch ceilings and walls appeal simultaneously to the eye and the ear: a powerful tool that allows for the fine-tuning of any interior environment!

Thanks to the patented cold installation technique, the implementation of **clipso** stretch walls and ceilings is quick, clean and non-intrusive (odourless, no drying time, no need to move furniture, etc.). As a result, **work-schedules are optimized and business closure is minimized.**

For example, a hotel bedroom of a 250 sqft hotel bedroom with plasterboard support may be renovated (walls and ceilings) in just one day.

In the most efficient manner, an exceptional result is achieved.

clipso offers a diverse range of coverings: acoustic, antibacterial, dirt-repellent, water-repellent, printable, translucent and standard coverings.

Both practical and decorative, **clipso** coverings are well adapted to every type of space within your establishment: restaurants, reception areas, seminar rooms, bedrooms, kitchens, spas, swimming pools, bars, lounges, sports rooms, etc.

State-of-the-art, durable and up to 16'8" wide, **clipso** products are CE, IMO and Sanitized certified, with Oeko-Tex eco-label and A+ label (the best score).

FRENCH MANUFACTURE
CERTIFIED ISO 9001.

Choosing **clipso** products means choosing an environmentally-friendly and highly comfortable solution as well as ensuring compliance with current and future standards!

“

Mr Jerome Mercier, owner of the Hotel du Parc (Paris) and Mr Fabrice Antore, architect, have tested and approved the quick installation of **clipso** coverings.

*We have chosen **clipso** coverings to renovate and redecorate the numerous rooms of the Hotel du Parc, simply because **the installation is clean and hassle-free**. Moreover, **the rendering and tones of the colors perfectly matched our wishes**.*

*Details of the project: 11 printed walls and 1 ceiling, approx 10,000 sqft, were installed in 2.5 days by 2 people (tracking – insulation – covering). **The 11 rooms remained booked during the installation**, as it was carried out so quickly that the disturbances were less than minimal. **In addition, since business continued as usual, we suffered no financial losses**.*

It was really a win-win operation for us. We were amazed by the final result, which is simply magnificent!
