## clipso sound® Acoustic comfort

Listen, it couldn't be better!

One of the greatest luxuries in public and private spaces is the acoustic comfort and quality of the surroundings.

After several years of intense research, CLIPSO® has developed CLIPSO SOUND®. The 250 000 micro-perforations per m<sup>2</sup> in the CLIPSO SOUND® covering plus a specifically adapted sound absorber (glass wool, rock wool, etc.) ensure that up to 90% of the surrounding noise is eliminated (conversation, music, etc.).

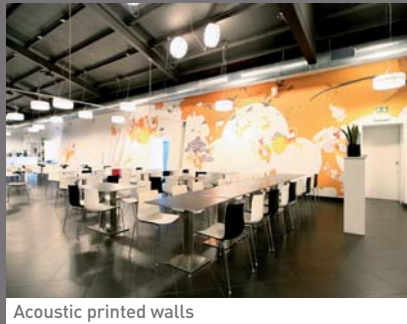

The perfect combination of comfort and style.

## clipso translucent® Ambient lighting

Light suggests life!

Lighting both defines a space and makes it visible. It is one of the most influential factors in creating a specific interior atmosphere.

CLIPSO TRANSLUCENT® fabric diffuses up to 80% of light. Backlight the translucent fabric with various lighting options to create a unique look. Make an impression by using changing color LEDs.

Let yourself be transported into a world of color and light.
