

## Sita Aero Project at the Atlanta International Airport: a digitally printed backlit wall!

**Clipso Technical Fabric was chosen to portray the world image of Sita Aero at the Hartsfield-Jackson International Atlanta Airport.** Working with Clipso's local Sales Representative Wally Brooks of Interior Elements, Gensler developed five images that were printed on

Clipso Translucent Fabric 507PT and suspended in five of Clipso's CCA Aluminum Frames. The frames were backlit with specialty lighting, enhancing the feature wall with a translucent glow. **Clipso's Aluminum frames provide easy access for maintenance of the lighting system.**

## St. Paul Country Club in St. Paul Minnesota: a monolithic ceiling with acoustic performance!

The St. Paul Country Club's member's are enjoying their new monolithic ceiling while at the same time overcoming the age old problem they were having with the loud environment making conversations hard to hear. **Now they can relax and enjoy their new aesthetically pleasing ceiling while having friendly conversations in the Country Club's Main**

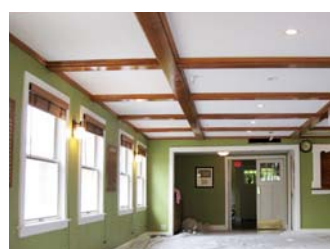

### Club House.

The Clubhouse was completed in two days by Twin City Acoustics who installed Clipso 705 S Fabric

into Clipso's patented CW White Profiles over acoustic absorbant material.

### CLIPSO 2009 overview in figures

**Clipso employees service all the major markets around the world.**

**5 offices including 2 new branches: New Delhi in India and Moscow in Russia.**

**Over 1,200 Installers and Sales Representatives.**

### Prospects for 2010...

2010 will be a year of innovation and development internationally.

Clipso will continue to develop our products in response to the demands of the marketplace.

We will also reinforce our presence in certain countries: **USA** – Our aim is to re-launch the market crippled by the economic crisis.

**INDIA** – We will continue our efforts to make headway in this market.

**UK AND RUSSIA** – Clipso will continue to assert itself on these two very promising markets.

## Clipso develops new products...

Clipso's R&D team is developing new products in order to offer you new decoration and furnishing concepts. Clipso products are suitable for public and private buildings: offices, shops, hotels, museums, homes, etc.

- The new profiles **CEP18, CAC140 and CPA67 & CRA68** enable you to install self-supporting ceilings, frames, boxes, etc. They create new architectural dimensions that adapt to any interior!
- Clipso also sells new accessories that are vital for installation: **a complete hanging systems.**
- The result of many years of research, the coverings **705 NOSWEAT, 705 NOSTAIN, 495D ACOUSTIC, 309T and 507PT** are the most recent additions to the Clipso product line. They are water resistant, dirt repellent and acoustically transparent. They have International Certifications such as CE, Oeko-Tex, Sanitized and IMO.

## ...new profiles: CEP18, CAC140, CPA67 & CRA68

### CEP18 Profile

The **CEP18** profile allows you to install frames, ceiling tiles and paintings. It can be attached with hooks or suspended thanks to different mounting systems. The profile is covered on one side: plain or printed.

### CAC140 Profile

The **CAC140** profile allows you to create boxes that are acoustic or back-lit. All it takes is the addition of acoustic absorbers or UL Approved lighting systems. This system can be suspended with cables. The boxes can be covered on one or both sides: with plain or printed fabric.

### CPA67 & CRA68 Profiles

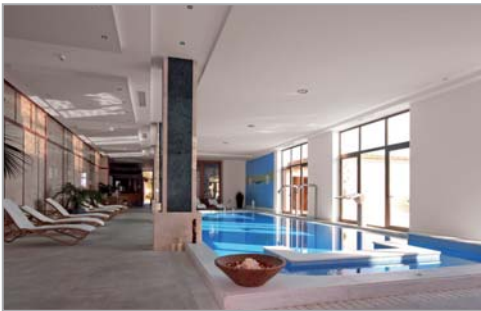

The **CPA67 & CRA68** profiles allow you to create self-supporting ceilings and panels. This system can be fixed to a pedestal. Suspended vertically or horizontally, it transforms into a panel or a ceiling cloud. The system can be covered with fabric on one or both sides: plain or printed. The frames are stocked in white, black, anodised or raw aluminum.

## ...new accessories : hanging systems

Clipso sells a **complete range of GRIPPLE brand hanging systems**, enabling you to install self-supporting ceilings, frames, etc.

## ...new coverings: 705 NOSWEAT, 705 NOSTAIN, 495D ACOUSTIC, 309T and 509PT

### **705 NOSWEAT: our water-repellent fabric**

Clipso 705 NOSWEAT is a water-repellent fabric which enables walls and ceilings to be kept clean and dry over time. The fabric is water-resistant, resists stains and dirt. Liquids form in droplets on the surface and dust does not stick to it.

The water-repellent Clipso fabric is suitable for damp areas (spas, swimming pools, bathrooms, etc.) or places likely to attract dirt (cafeterias, kitchens, professional premises, etc.). Internationally Certified Sanitized, Clipso 705 NOSWEAT prevents bacteria, mildew and allergens from collecting.

### **705 NOSTAIN: our stain-resistant fabric**

Clipso 705 NOSTAIN is a stain-resistant fabric, our new product which enables even most of the toughest stains to be removed with just a damp sponge, such as coffee, tomato ketchup, etc.

The walls and ceilings will remain in excellent condition, as if they had just been installed. Clipso dirt-repellent covering is particularly recommended in places with a high risk of staining, such as schools, factories, kitchens, children's bedroom, etc.

### **495D ACOUSTIC: our acoustic fabric**

Today, the greatest luxury at home and at work is the acoustic comfort and quality of our surroundings. Clipso 495D ACOUSTIC is an innovative covering which features 250,000 micro-perforations per 1.09 sq. yds. Backed with an acoustic absorbent material, it can obtain NRC's of up to 1.05.

The Clipso acoustic covering is compatible with all types of acoustic absorbent materials, such as fibreglass, rock wool, etc.

### **309T and 509PT : our translucent and printable fabrics**

Our 309T and the 509PT are both the latest fabrics in the Clipso product line. They are environmentally friendly: free from PVC and heavy metals. These fabrics achieve light transmission rates of 80% and 53%. Whether using back-lighting, lights that change colors, changing or projecting images, the result is magnificent!

The 309T and the 509PT are the ideal fabrics for digital printing: the image is excellent! Perfectly suited for ceilings, walls, frames, boxes, etc.

## Clipso is a winner at the 2010 Batiweb Awards!

Clipso has had an excellent start to the new year. During the Batiweb Awards' ceremony, for the third year running, Clipso won best product in the "Ceilings" category. The ceremony took place on February 2 2010 in the chic "Automobile Club de France" building at Place de la Concorde.

This prestigious reception recognised the most efficient products in 20 different categories. It was attended by all participating industrialists and professionals in the sector.

## New Clipso marketing tools!

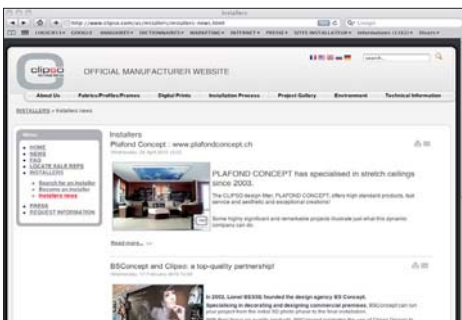

• The **Architectural Binder** is a complete tool for the presentation of Clipso products. It includes technical data, sales documents, samples of our fabrics, 3-Part Spec, and a Project Portfolio.

• Clipso has also developed a **Point of Purchase Display** (standard dimensions approximately 5' 10" x 1' 11" ) entirely made up of Clipso profiles and coverings. Both mobile

and aesthetic, it can be displayed in showrooms, trade shows, offices, etc. The two sides are printed: the front side highlights the advantages to Clipso products and the back side presents Clipso installations. It also includes a document display unit (dimensions approximately 6.49" x 4.40" x 1.65"). The Point of Purchase exists in 6 languages (French, English, Russian, German, Italian and Spanish) and is delivered as an assembly kit.

## www.clipso.com promotes our installers!

The website **www.clipso.com** added a specifically to promote our installers just a couple of weeks ago.

This "Installers" page is entirely dedicated to you. It aims to highlight Your Know-how, Your skills, Your creativity. It will act as a reference and enable us to present the many applications of Clipso fabrics in their diverse configurations.

This section, created especially for you, will serve as an additional showcase for all our installers who want to benefit by having a communication tool and increased visibility for their installations.
