

**You have respected all our indications and in spite of this you face a problem. No stress, this may be not serious.**

- **if dirty**: rub slightly the surface with a humid and clean glove or tissue. Humidify the tissue **with a neutral PH solution or use the product we advice under the ref.**

**O-CCL10E** . If the mark still persists, do not hesitate to contact us.

- If a **fold remains** after the fitting: think to **use the heatgun**, please remind to test it first on a fabric scrap. When using it, don't hold it too close or too long of the fold and be particularly cautionnous by using it close to the PVC profiles. Effect is immediate.
