clipso, the ideal solution for the decoration or renovation of spaces in the hotel and catering industries.

estaurants and hotels are associated with well-being. harmony calmness. and Their requirements focus upon safety, acoustic insulation and esthetics. clipso stretch ceilings and walls respond fully to these requirements and are perfectly suited to these kinds of structure, whether brand new or for renovation.

Thanks to the patented cold installation technique, the implementation of **clipso** stretch walls and ceilings is quick, clean and nuisance-free (odourless, no drying time, no need to move furniture, etc.). As a result, it optimises work schedules and limits the shutdown time of your premises.

As an example, a hotel bedroom of 20 m² on a plasterboard support may be renovated (walls and ceilings) in just one day. **This provides maximum efficiency for an exceptional result.** **clipso** offers you a whole range of coverings and a multitude of possibilities: Standard, Color, Pearlescent, Acoustic, Translucent, Antibacterial*. All **clipso**'s coverings are printable.

Both practical and decorative, **clipso** coverings are **perfectly adapted to every possible space within your establishment:** restaurants, reception areas, seminar rooms, bedrooms, kitchens, spas, swimming pools, bars, lounges, sports rooms, etc.

State-of-the-art, resistant and **made up to 5 metres wide**, **clipso** coverings are **CE certified** according to current standards on ceiling installation, with **OEKO-TEX green label certification** and **SANITIZED antibacterial certification**.

FRENCH MANUFACTURE CERTIFIED ISO 9001.

Choosing **clipso** products means choosing an environmentally-friendly and highly comfortable solution as well as ensuring compliance with current and future standards!

Conceptual room «Senses Room», Paris (FRANCE) -Backlit printed wall and white acoustic ceiling -Fitter: Francis Von Der Wall

Claridge Hotel, Paris (FRANCE) -Trompe-l'oeil printed wall - Fitter: Sols Décoration Murs

CLIPSO gives you the choice: a plain stretch fabric, a digital printed covering, a LED lighting solution, an acoustic ceiling or wall... or even a frame from our new brand **AEROCEILING.**

AEROCEILING offers you a wide range of frames and shapes, which combines, in a very efficient way, all **CLIPSO** stretch fabric benefits with esthetic and technical advantages.

AeroSilent frames are made up of an acoustic insulation layer and a technical fabric. This combination helps to reduce noise pollution.

AeroLight tiles are perfect to create a custom light and so a very personal atmosphere.

Our range **AeroSilent & Light**, technical innovation, results from the combination of these two techniques.

At least, **AeroCustom** gives you carte blanche to customize your aluminium frame. We take charge of digital print based on your own file, imagery, logo or photo from a photo library. **AEROCEILING** by **CLIPSO** is the perfect product to sublimate your interior as well as to communicate efficiently, either for one-shot or for permanent campaigns.

Restaurant Destino 56, Valencia (SPAIN) -Backlit printed wall -Fitter: Ceilica Innovacion SL -Architect: Carmen Baselag

Bernard Haupert, our local partner installed on the island of La Reunion, managed and installed successfully this project, in the hotel DINA MORGABINE.

72 rooms, for a total surface of 315 sqm, were fitted with Clipso stretch fabrics over the course of a month and a half. The step 1 consisted of applying a first coat of primer. Following this, the black coloured wall profiles were installed. In order to accelerate this process, Bernard Haupert chose the stapable version of the products, so he could quickly fix them in place. At the same time, an acoustic matting was stapled to enhance the acoustic insulation of each room. The matting was then covered with an Acoustic Clipso stretch fabric, printed with one out of the 5 images selected by the client. Clipso Design helped out to size each of the images quickly. The project was managed over 45 days, with a minimum impact on the daily business of the hotel: the products are fitted at ambiant temperature, meaning there is no odour, no nuisances and the rooms could be rented out straight away again.

Hotel Dina Morgabine (La Reunion Island, FRANCE) -Headboards -Printed acoustic fabrics -Fitter: Bernard Haupert

66

Clipso became an obvious solution for the client, as this is the only simple and fast solution combining esthetics, acoustics and full customisation
