- A+ labelling (the best score) for improved interior air quality
- Free from carcinogenic substances (CMR) and volatile organic compounds (VOCs)
- Recyclable

# clipso sound®

## Improve the acoustics of your space!

Since many years, acoustics becomes essential for every tertiary space.

CLIPSO®, stretched fabric specialist has developed the CLIPSO Sound® range of acoustic coverings. Imagined and developed with sound professionals, our fabric is micro-holed in order to absorb the sound. You just need to add our sound absorber, to achieve an excellent acoustic performance. Thanks to CLIPSO you can offer a better acoustic comfort to your guests (conversation, music..)

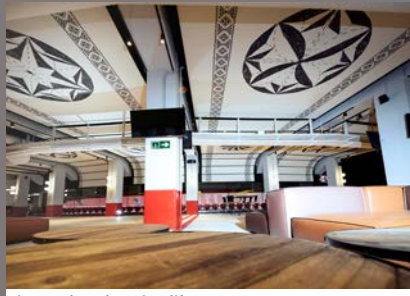

## The perfect combination of comfort and style.

# clipso translucent®

## Let the lighting in!

Lighting defines the appearance and perception of the space. It also creates a specific atmosphere and adds to our sense of well-being.

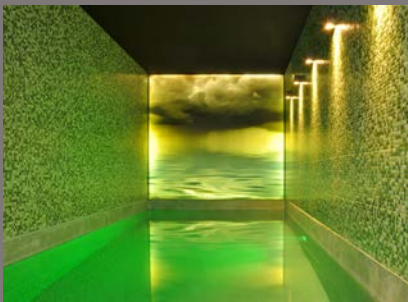

CLIPSO Translucent® coverings diffuse up to 70% of light. Used for back-lighting, colour changes or projections, they create a light, warm environment.

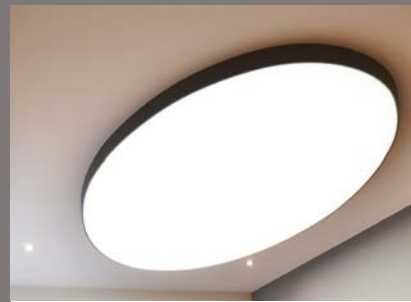

Back-lit printed vortex

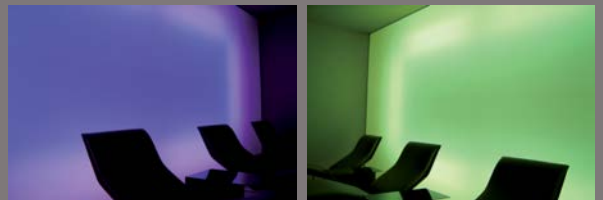

Back-lit printed ceilings

Back-lit acoustic frame

Back-lit colour-changing walls

## When the lighting becomes a game of which you know the rules!

CLIPSO also proposes a translucent and acoustic fabric which enables you to combine acoustic and back-lighting.
