CLIPSO® EXPERIENCE

CLIPSO® high-tech coverings allow you to dress all types of walls and ceilings, from small cabins to large communal areas on cruise ships.

The shades are perfectly uniform and the colour chart offers a wide selection. The coverings complement a designed interior with decorative touches or large printed and customised coverings.

CLIPSO® EXPERIENCE

CLIPSO® solutions are waterproof and stain-proof and are designed to be resilient against the constraints of nautical living spaces. Good sunlight coverage brightens all interior partitions.

This covering can also ensure softer and more pleasant acoustics by limiting the noise disturbances associated with a ship's confined spaces.

The texture, velvety to the touch, makes the living area a real bubble of comfort. A selection of soft colours can also increase the cocooning sensation.

CLIPSO® EXPERIENCE

With CLIPSO® solutions, cabins grow roomier and more comfortable. The taut covering ensures a smooth and superior acoustic quality.

Installation is quick and easy. Its small size saves space, thus optimising the interior design of large cruise ships.

For a softer light, choose a backlit surface: combine the aesthetic covering with indirect lighting and create a much warmer atmosphere.

And let's not forget the magic word: elegance.
