

# SO LIGHT

THE SOLUTION FOR ILLUMINATING YOUR INTERIORS!

Optical store - Spots and backlit boxes integration  
Germany - Application : Optimaler

Private house - Acoustic ceiling with spots integration  
Belgium - Application : MONAVISA

Embellish your entire space with a luminous effect that simulates daylight.

Showcase your products in your stores and showrooms with modern and immaculate light.

## SPOTS & OPTICAL FIBER

Enjoy your home with a soft and warm atmosphere; your decoration is highlighted by a smooth brightness and well balanced.

Dream under the stars with the optical fibers embedded in our fabrics!

On walls or ceilings, you create a unique atmosphere that makes you dream.

Printed wall with integrated optical fiber - France  
Application : CLIPSO PRODUCTION

IVECO booth - Ceiling with integrated optical fiber

Dental clinic - Ceiling with backlit circles

SHOPPING MALL - XXL LIGHT FIXTURES  
IN ALUMINUM STRUCTURE - BACKLIT COVERINGS - FRANCE  
APPLICATION : SPIDER DESIGN

## LIGHT IS NECESSARY, EVEN VITAL TO REGULATE OUR BODY AND MOOD.

The brightness as for it, depends on the perception we have at the moment. It's therefore essential today to adapt our interiors, workplaces as our "home", to evolve in a pleasant atmosphere that fits us.

The SO LIGHT range has been developed to enhance your spaces; bright and friendly, sophisticated and elegant, or cozy and calming.

From the integration of spots in a stretched ceiling to a printed frame, through a translucent backlit fabric with LEDs, the SO LIGHT range allows you to imagine your own scenography.

RESTAURANT - ACOUSTIC CEILING WITH LIGHT PATH  
INTEGRATION AND BACKLIGHT - DENMARK  
APPLICATION : RALBO

Print

## LED & BACKLIT

With the LED you have at your disposal an infinite choice: whether you need a mood lighting, either directional or functional lighting!

The compatibility of LED with our fabric gives you total customization: a printed coating with your choice of images or an artist's creation will create a unique atmosphere.

Want to play on light intensity or colors? Here again the association of a certain type of LED will allow you to create this soft and warm personalized atmosphere.

Our workshops will create the lighting you need, we will design for you the most suitable shape and offer various light intensities.

This shape will be modern, elegant, aesthetic or refined ... Conform to your desires!

Backlit aluminum structures - Light Fixture - Switzerland  
Application : Linsi-tech

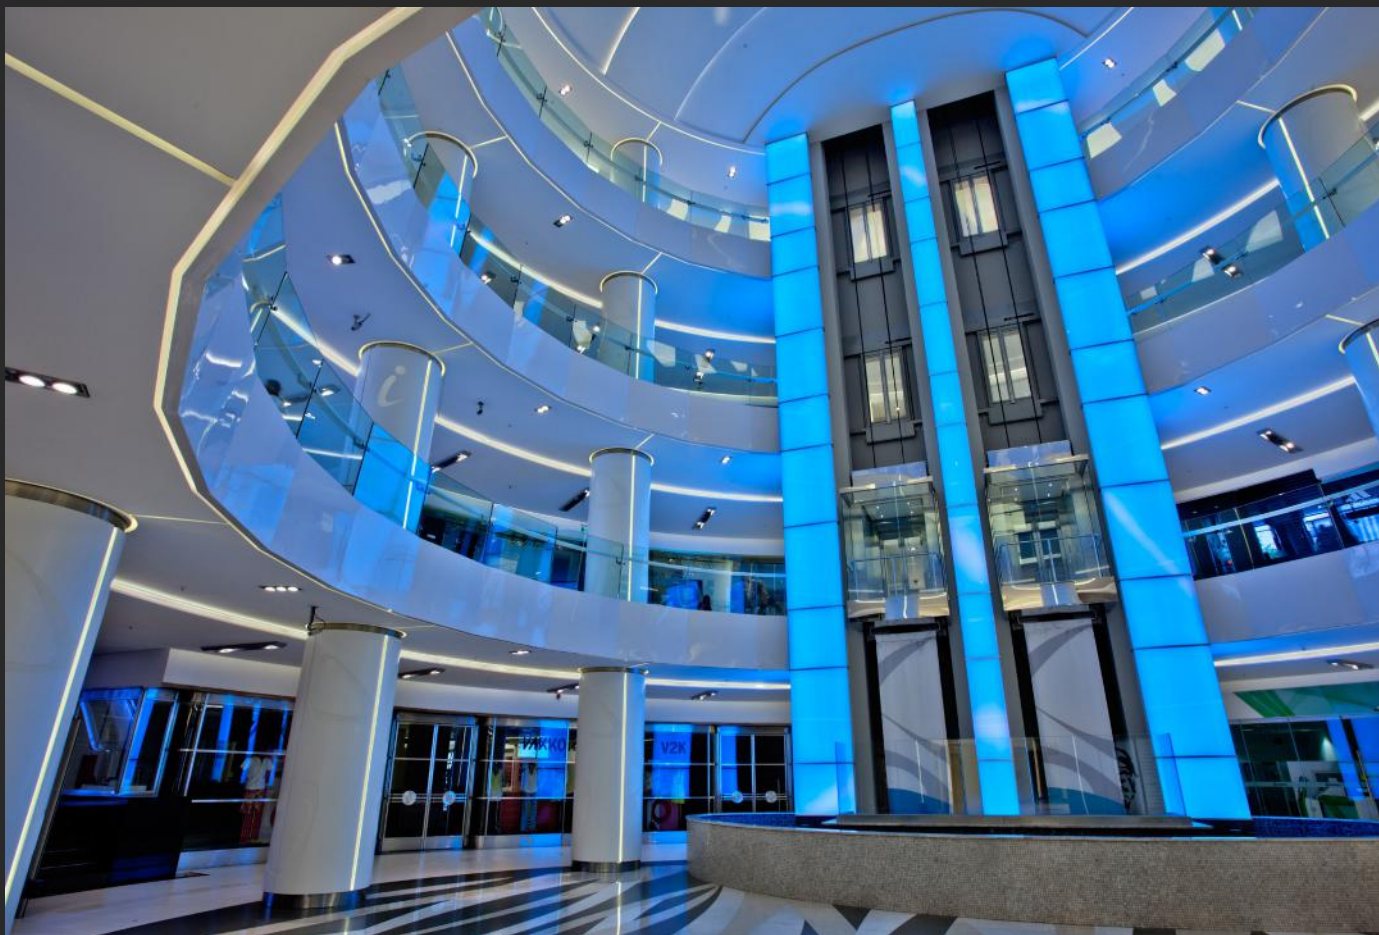

Wall box - Backlit printed covering - Belgium  
Application : City Outdoor

Restaurant - Backlit printed covering - Belgium - Application : MONAVISIA

Shopping mall Akmerkez - Backlit covering - Turkey - Architect : Filiz Yilmaz - Application : TTI Elektrik Elektronik

## LIGHTNING & ACOUSTIC

Today, it is possible to do much more; beyond its strong aesthetic potential, the SO LIGHT translucent fabric combines acoustic performance.

Some public spaces are now designed to make acoustics as pleasant as possible, shopping malls in which ubiquitous noise must be mitigated, or medical practices where discretion is required.

Reception desk - Backlit RGB coverings - Thailand - Application : CCSE

Backlit trompe-l'oeil ceiling - Germany  
Application : Baumann

## SKILLS AT YOUR SERVICE

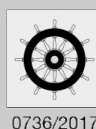

Ecophon Clipso® strives to support you at all stages of your project; from the sales team to the technical and design teams, we put all our skills and areas of expertise at your service.

Customized being our strength, the design office evaluates the feasibility of your project. If you need technical advice for the realization of a frame, an aluminum structure or a non-standard installation, the design office Ecophon Clipso® works with you to estimate, size and determine the most suitable solution.

The success of your achievement is our requirement.
